

Randy Bias

Many years of research conducted by The Gallup Organization suggest that the most effective people are those who understand their strengths and behaviors. These people are best able to develop strategies to meet and exceed the demands of their daily lives, their careers, and their families.

A review of the knowledge and skills you have acquired can provide a basic sense of your abilities, but an awareness and understanding of your natural talents will provide true insight into the core reasons behind your consistent successes.

Your Signature Themes report presents your five most dominant themes of talent, in the rank order revealed by your responses to StrengthsFinder. Of the 34 themes measured, these are your "top five."

Your Signature Themes are very important in maximizing the talents that lead to your successes. By focusing on your Signature Themes, separately and in combination, you can identify your talents, build them into strengths, and enjoy personal and career success through consistent, near-perfect performance.

Strategic

The Strategic theme enables you to sort through the clutter and find the best route. It is not a skill that can be taught. It is a distinct way of thinking, a special perspective on the world at large. This perspective allows you to see patterns where others simply see complexity. Mindful of these patterns, you play out alternative scenarios, always asking, "What if this happened? Okay, well what if this happened?" This recurring question helps you see around the next corner. There you can evaluate accurately the potential obstacles. Guided by where you see each path leading, you start to make selections. You discard the paths that lead nowhere. You discard the paths that lead straight into resistance. You discard the paths that lead into a fog of confusion. You cull and make selections until you arrive at the chosen path—your strategy. Armed with your strategy, you strike forward. This is your Strategic theme at work: "What if?" Select. Strike.

Relator

Relator describes your attitude toward your relationships. In simple terms, the Relator theme pulls you toward people you already know. You do not necessarily shy away from meeting new people—in fact, you may have other themes that cause you to

enjoy the thrill of turning strangers into friends—but you do derive a great deal of pleasure and strength from being around your close friends. You are comfortable with intimacy. Once the initial connection has been made, you deliberately encourage a deepening of the relationship. You want to understand their feelings, their goals, their fears, and their dreams; and you want them to understand yours. You know that this kind of closeness implies a certain amount of risk—you might be taken advantage of—but you are willing to accept that risk. For you a relationship has value only if it is genuine. And the only way to know that is to entrust yourself to the other person. The more you share with each other, the more you risk together. The more you risk together, the more each of you proves your caring is genuine. These are your steps toward real friendship, and you take them willingly.

Input

You are inquisitive. You collect things. You might collect information—words, facts, books, and quotations—or you might collect tangible objects such as butterflies, baseball cards, porcelain dolls, or sepia photographs. Whatever you collect, you collect it because it interests you. And yours is the kind of mind that finds so many things interesting. The world is exciting precisely because of its infinite variety and complexity. If you read a great deal, it is not necessarily to refine your theories but, rather, to add more information to your archives. If you like to travel, it is because each new location offers novel artifacts and facts. These can be acquired and then stored away. Why are they worth storing? At the time of storing it is often hard to say exactly when or why you might need them, but who knows when they might become useful? With all those possible uses in mind, you really don't feel comfortable throwing anything away. So you keep acquiring and compiling and filing stuff away. It's interesting. It keeps your mind fresh. And perhaps one day some of it will prove valuable.

Learner

You love to learn. The subject matter that interests you most will be determined by your other themes and experiences, but whatever the subject, you will always be drawn to the process of learning. The process, more than the content or the result, is especially exciting for you. You are energized by the steady and deliberate journey from ignorance to competence. The thrill of the first few facts, the early efforts to recite or practice what you have learned, the growing confidence of a skill mastered—this is the process that entices you. Your excitement leads you to engage in adult learning experiences—yoga or piano lessons or graduate classes. It enables you to thrive in dynamic work environments where you are asked to take on short project assignments and are expected to learn a lot about the new subject matter in a

short period of time and then move on to the next one. This Learner theme does not necessarily mean that you seek to become the subject matter expert, or that you are striving for the respect that accompanies a professional or academic credential. The outcome of the learning is less significant than the “getting there.”

Individualization

Your Individualization theme leads you to be intrigued by the unique qualities of each person. You are impatient with generalizations or “types” because you don’t want to obscure what is special and distinct about each person. Instead, you focus on the differences between individuals. You instinctively observe each person’s style, each person’s motivation, how each thinks, and how each builds relationships. You hear the one-of-a-kind stories in each person’s life. This theme explains why you pick your friends just the right birthday gift, why you know that one person prefers praise in public and another detests it, and why you tailor your teaching style to accommodate one person’s need to be shown and another’s desire to “figure it out as I go.” Because you are such a keen observer of other people’s strengths, you can draw out the best in each person. This Individualization theme also helps you build productive teams. While some search around for the perfect team “structure” or “process,” you know instinctively that the secret to great teams is casting by individual strengths so that everyone can do a lot of what they do well.
